

Complex Class

```
+realPart: double
+imaginaryPart: double
Complex(double res, double imag):double
Complex(doube res): double
Complex(): double
+add(Complex n1): Complex
+subtract(Complex n1): Complex
+multiply(Complex n1): Complex
+divide(Complex n1): Complex
+abs(): double
+toString(): String
+compareTo(): int
+clone(): Object
+intValue(): int
+longValue(): long
+floatValue(): float
+doubleValue(): double
```
